“ My daughter Christina was born with Prader-Willi Syndrome (PWS). Like every father, I hoped that Tina would grow up to have an abundant, meaningful life. People with PWS require round-the-clock supervision. It was difficult to imagine how Tina might ever leave home and the care and safety of our family. At Latham Centers, Tina lives in a beautiful group residence with housemates who have become friends and caregivers who foster her independence. She has a full and happy life. ”
